FOR IMMEDIATE RELEASE

**GILEAD SCIENCES ANNOUNCES LAUNCH OF ASIA PACIFIC
ALL4LIVER GRANT 2021**

*– Biennial Grant Program Supports Community Projects Focused on Improving Education About
Liver Health in Singapore and 10 Other Countries and Territories –*

– Inaugural Cycle of the Grant will Focus on Hepatitis B Awareness Initiatives –

Singapore, 28 July 2021 – Gilead Sciences, Inc. today announced the launch of the 2021 Gilead Asia Pacific ALL4LIVER Grant, a new grant program to support local communities in strengthening liver disease education efforts across Asia Pacific. This biennial grant will support community-led projects that can help improve liver health for people living in the region. The focus of 2021’s grant program is on chronic hepatitis B under the theme, “*Empowerment Through Education*”.

“Liver health and particularly, viral hepatitis, remains a public health threat affecting millions of people across the Asia Pacific region. Awareness of chronic hepatitis B and actions that can be taken to improve health remain low in many communities most impacted by the disease. Through this new grant program, we look forward to supporting innovative projects that can propel regional efforts to make viral hepatitis elimination a reality,” said Alex Kalomparis, Vice President of Public Affairs, International, Gilead Sciences.

Stanley Li, General Manager, Singapore, Hong Kong & Malaysia, Gilead Sciences, added: “We are invested in the fight against viral hepatitis and are uniquely positioned to empower those who can help bring this conversation to the forefront. Through the Asia Pacific ALL4LIVER grant, we look forward to working closely with equally passionate organizations to advance the care of people living with liver disease and strengthen our commitment to create a healthier world for everyone.”

While communities around the world continue to address the challenges posed by the COVID-19 pandemic, Gilead and its partners remain focused on efforts to support the World Health Organization’s 2030 goal of eliminating global viral hepatitis. Hepatitis B and C affect 325 million people worldwide¹. Asia continues to carry a significant burden of these diseases with 178 million infections².

The ALL4LIVER Grant, which will run every two years, aims to empower organizations that can help bring liver health, in particular viral hepatitis, to the forefront of public health initiatives and address the unmet needs in the region. The program was inspired by a regional study, conducted by Gilead, which found critical gaps in the public awareness and attitudes towards viral hepatitis.

The 2021 ALL4LIVER Grant cycle is open to community groups in 11 countries/territories in Asia Pacific: Singapore, Hong Kong, India, Indonesia, Malaysia, Pakistan, Philippines, South Korea, Taiwan, Thailand, and Vietnam. This year’s version of the grant seeks to support projects in hepatitis
